## SUMMARY

I am a Software Developer, with an extensive IT background, who recently completed a six month immersive full stack program.

Following a successful mini-career in nonprofit building and management, today I hope to use code to advance human progress.

## SKILLS

- JavaScript
- Graphic design
- Systems administration
- Database management
- Technology consulting
- Hardware support
- Staff management
- eCommerce execution

## GALVANIZE

### Full Stack Software Fellow (JavaScript), February 2016–July 2016, SF

During the immersive 24-week Galvanize Web Development curriculum, learned languages and frameworks, including:

- JavaScript, HTML, CSS, Python, and Client-Side Programming
- Server-Side Programming w/ Node, Express, and PostgreSQL
- Angular, Single-Page Applications, APIs, and Microservice Architecture
- Projects: Poison Emergencies Data Visualizations and LonelyTable

## AFGJ / IHC

### Executive Project Director, 2005–2016, Oakland

Director of a military law advocacy project, responsible for staff, fiscal planning, marketing, public relations, social media, and fundraising. From zero, grew annual budget to \$1M, staff to 8 FTE's, Facebook community to 100k, and direct email to 55k, via 5k individual donors. Versed in labor law. Primary organization evangelist. Proficient in most Adobe apps, especially Photoshop. Deployed and managed WordPress installations.

## UNIVERSITY OF CALIFORNIA SAN FRANCISCO

### Programmer / Analyst / Systems Admin, 1996–2005, SF

Hardware, networking, desktop and SQL Server data support for the four emergency call centers that comprise the California Poison Control System (CPCS), managed by UCSF. The hotline provides 24/7/365 information to medical professionals and the general public—over 1,000 times a day. Promoted from LAN admin and desktop support. Created intranets and public websites, using PHP scripts and MySQL.

- Cisco Certified Network Associate

## PATERSON CONSULTING

### Website Developer / IT Consulting / Data Management, 1992–1998, SF

Developed static websites for small business, including law firms, art galleries, and non-profit organizations. Installed and supported LAN's, specializing in small law firms. Built and deployed custom database solutions. Contracts included:

- **Palladino & Sutherland, Data Management**  
Custom database solutions for private detective investigations.
- **Law Office of Scampini Mortara & Harris, IT Support**  
Law office LAN, desktop, and connectivity installation and support.
- **US Congresswoman Jackie Speier, Campaign Data Manager**  
Secretary of State election campaign HQ staff.

## EDUCATION

### ASSOCIATE DEGREE IN APPLIED ELECTRONIC SCIENCE

#### Heald Institute of Technology, 1991–1992, SF

Studied information sciences and support services, including: C+, LAN management, hardware repair, desktop configuration, and digital circuits.
